

Paper Playground 2D Uppercase Alphabet Sheets

The Imagination Playground 2D Uppercase Alphabet Sheets are designed to support children's early literacy exploration using photographic images of letter constructions on a flat surface. Most children begin to create letter and number formations on a flat surface, before exploring the 3D possibilities with blocks.

Use the Imagination Playground 2D Alphabet Sheets as provocations for your children's early literacy play and as guides to support children's block letter constructions. Or print out each sheet to create an alphabet wall. To create a tabletop literacy activity, print out two copies of the images 4 pages to a sheet, cut into quarters to create an Imagination Playground alphabet matching game or as a resource for your writing desk. The letter play possibilities are endless!

Once your children feel comfortable with their letter constructions in a 2D form, be sure to check out our 3D letter constructions as well (coming soon!).

We Transform Children's Minds, Bodies, and Spirits through Play!
