

Paper Playground Number Line

Math is everywhere in the classroom and a big part of block play in early childhood! The Number Line Sheets are designed to support children's early numeracy understanding and exploration using photographic images of the Imagination Playground.

Being able to easily count and identify groupings of 1, 2, 3 are important skills for young children to master. As children grow, we need to support their ability to identify larger groupings. Our number line includes numbers 1 - 10.

Use the Imagination Playground Number Line Sheets as a resource in your classroom to support counting, cardinality and early numeracy skills. Print out full sized sheets to post as a number line on the wall of your classroom, or use the print outs as provocations for construction, math play, and more! To create a tabletop math activity, print out the images 4 pages to a sheet, cut into quarters to create an Imagination Playground number game and use with our Imagination Playground Small Blocks. Or, print out two copies to create a math matching game.

We Transform Children's Minds, Bodies, and Spirits through Play!
